The most popular range of filler injection tools

- **Broad series of cannulas**

Eight different sizes carefully selected to match all needs

- **Adapted to every clinical application**

One or more sizes for each area, direction of injection and depth

- **Designed for all fillers on the market**

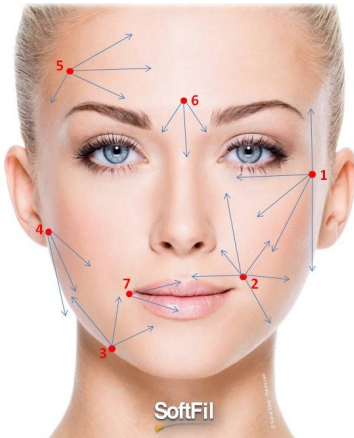

Lengths, outside diameters and internal calibers suitable to any filler range

- **Praised for its quality and reliability**

Perfect flexibility and robustness of the stainless tube and plastic hub

- **Full clinical safety**

Minimal traumatism on tissues thanks to cannula's blunt tip

The SoftFil® Classic range of micro-cannulas is ideal for beginners as well as confirmed users. It has been developed after the renowned Soft Filling Technique, a standardized injection method accessible to all physicians.

Whatever the technique, at least two types of cannulas can be selected from the SoftFil® Classic range. For each area injected, it will match your needs in terms of entry point, area breadth and injection depth.

Each type of SoftFil® Classic cannula has been tested from a rheological and clinical viewpoint with all fillers available on the market as well as for PRP.
