NEW micro-cannulas to complete the expert range: 25G 40mm and 27G 25mm

Main features:

- Centimetric graduation along the stainless steel tube for symmetrical injection depth
- Surface treatment to allow perfect sliding under the skin
- Extra-large internal caliber to reduce injection pressure
- Red dot hub indicating side orifice location for precise injections

The XL internal caliber requires less pressure during injection

Sold in a box of 20 sterile kits. Each kit contains a cannula and a sharp needle same Gauge for pre-hole
