

INNOVATIVE TOOLS AT YOUR FINGERTIPS, FOR OPTIMUM RESULTS

## PIONEERING

### WHO ARE WE?

Soft Medical Aesthetics were set up in 2009 with a view to assisting **healthcare professionals** specializing in aesthetic medicine and age-defying treatments.

### OUR MISSION

Working closely with anti-aging experts and drawing in particular from the experience of **Dr Sandrine Sebban (Paris)** who has developed the **Soft Filling Technique®**, Soft Medical Aesthetics strive to transform the tools and techniques used and ultimately, the results achieved for the patient.

SoftFil® micro-cannulas, revolutionary round-tip needles, have become an industry reference. Soft Medical Aesthetics are also designing cosmetic products to complement the work of practitioners and, in turn, delight patients (products available for hydrating, moisture-lock, smoothing of fine lines, radiance boost...).

## THE PRACTITIONER'S NATURAL CHOICE

## INJECTIONS with the *french* TOUCH

The **Soft Filling Technique®** for immediate, natural results: an innovative and a-traumatic injection technique for all facial hyaluronic acid treatments.

The injection of hyaluronic acid as a filler has become one of the most administered treatments in restoring facial features that have suffered from the effects of time (sunken cheeks and temples, sagging jaw-line, appearance of wrinkles). **The results are immediately visible subtle, natural-looking and harmonious.**

Hand-in hand with this new approach, the highly innovative Soft Filling Technique has been developed through the research and work of leading anti-aging experts.

The **Soft Filling Technique** is based on the use of flexible, round-tip micro-cannulas and a limited number of insertion points. This a-traumatic procedure is virtually pain-free and can be carried out in a doctor's surgery or in the operating theatre, with or without local anaesthesia. It can also be applied to the neck, décolleté and hands.

**+** The **Soft Filling Technique** is primarily designed to re-volumize the face and lips and to correct wrinkles in a very subtle way. The face can be treated as a whole, restoring its natural contours and giving it a more harmonious and youthful appearance, using few insertion points (above) - typically only 2 to 4 on each side to cover the entire face.

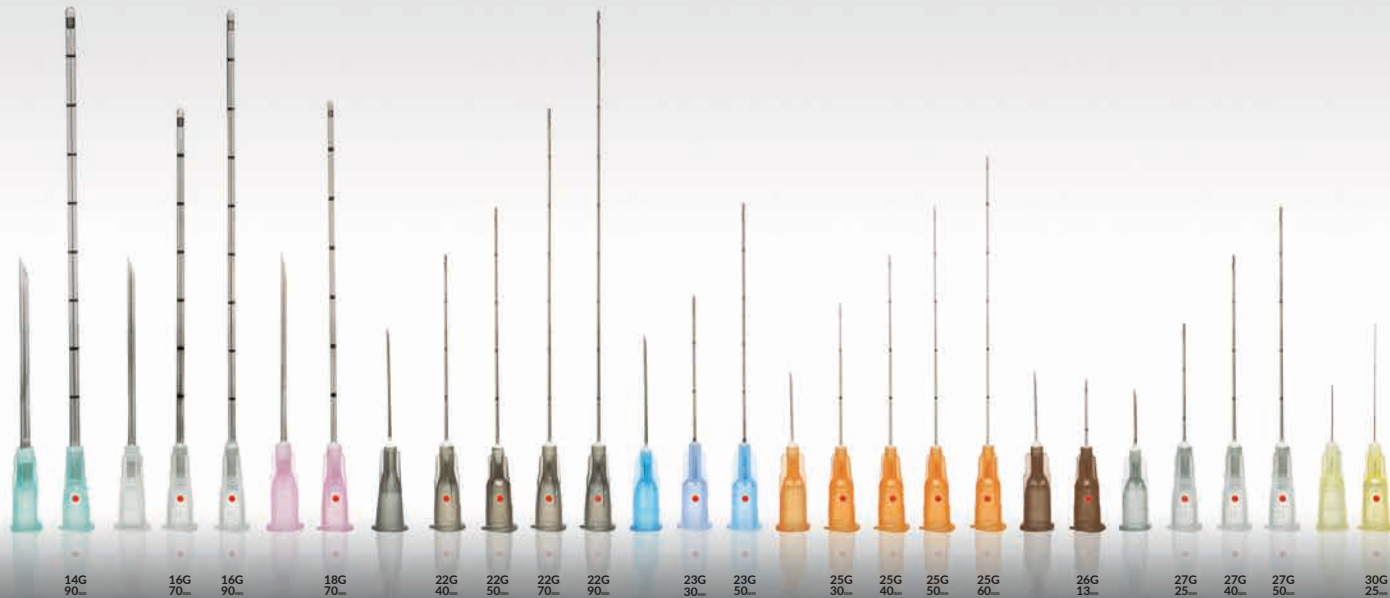

**•** The **One Point Technique®** is a further innovation: using just one insertion point on each side, this technique allows physicians to treat two thirds of the face from a single entry site. SoftFil® flexible micro-cannulas glide into the skin without bruising and can be used for injecting superficial or deeper fillers. The "lift" effect is visible on both young and more mature skin, adding fullness and tightening up the face as a whole, making it look younger and more balanced.

# V E R S A T I L E

A comprehensive range of micro-cannulas suitable for injecting all types of filler, lipofilling and PRP

SoftFil® *Classic*

SoftFil® *Precision*

## SOFTFIL® MICRO-CANNULAS

PRECISE AND PERFECT CONTROL

Introducing SoftFil® micro-cannulas: these highly innovative, flexible but robust blunt-tip needles are perfectly designed for all practitioners from novice to expert.

Whatever the particular challenges of a given injection area, the SoftFil® micro-cannula range will provide you with the tools and the confidence to succeed.

- Flexible, hypodermic, round-tip micro-cannulas for hyaluronic acid, lipofilling and PRP injections
- Supplied as a kit containing one micro-cannula and its corresponding pilot needle, with individual protective caps
- Suitable for different types of fillers, injection areas and depths
- Renowned for their quality and reliability
- Full clinical safety
- High quality stainless steel
- ISO colored embasis for a fast identification of size

*Sold in boxes of 20 sterile, single-use packs*

### SoftFil® *Classic*

#### FEATURES & BENE-

- Large (L) inner calibre
- Female Luer-Lok fitting system
- 8 sizes and lengths

SoftFil® *Classic*  
Large

SoftFil® *Precision*  
Extra Large

### SoftFil® *Precision*

Normal

#### FEATURES

- Extra-large (XL) inner calibre
- Graduated in centimetres
- Specific surface treatment
- Red dot on hub
- Female Luer-Lok screw fitting system
- 19 lengths and calibers

#### BENEFITS

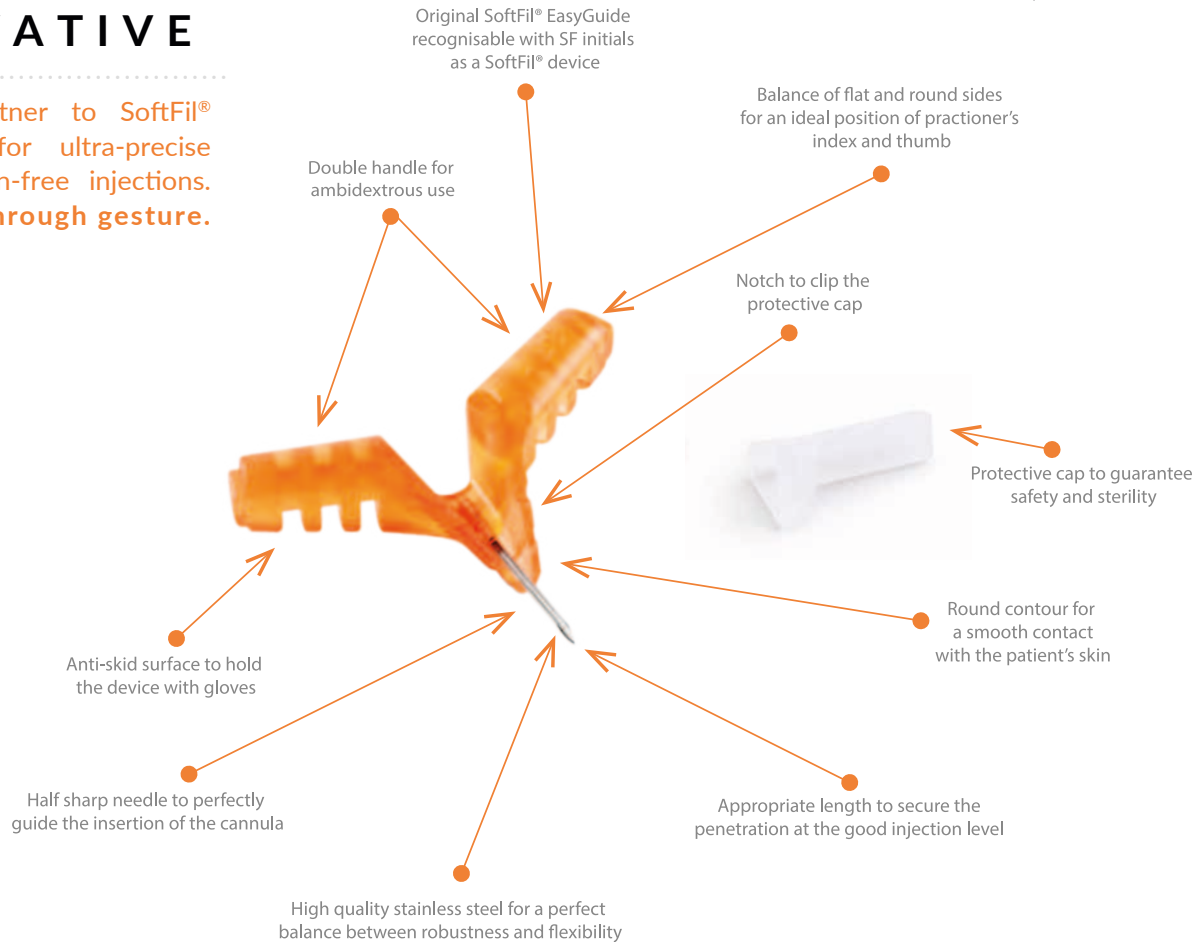

- Reduced injection pressure
- Symmetrical control of injection depth
- Perfect sliding
- Indication of side orifice location
- Extra security

SoftFil® EasyGuide

## INNOVATIVE

The perfect partner to SoftFil® micro-cannulas, for ultra-precise and virtually pain-free injections. A 2 in 1 breakthrough gesture.

## SOFTFIL® EASY GUIDE

For **easy injections...**  
...and much more !

The new SoftFil® EasyGuide (international patent pending) as a specific "pilot needle" ensures practitioners an ideal visibility of the injection point to aim at. Thanks to the unique shape of the needle, the cannula is perfectly positioned to be guided into the appropriate injection level. The injection is facilitated, for a good comfort of your patient.

### FEATURES & BENEFITS

Highly innovative device for making an insertion point and sliding the micro-cannula together through its open axis

- New distinctive "V" shape for easy, gentle, precise injections
- Perfect tool for fast, safe and effective injections, minimizing tissue damage, hematoma or swelling
- Designed for optimal use

*Sold in boxes of 20 sterile, single-use packs*

### An easy way to use the SoftFil® EasyGuide

- Hold the SoftFil® EasyGuide by one handle
- Create a pre-hole at the identified entry point with the SoftFil® EasyGuide

- Insert the appropriate micro-cannula into the pre-hole by sliding it along the SoftFil® EasyGuide into the desired injection level

- Remove the SoftFil® EasyGuide from the entry hole and proceed gently with the injection, using the red point on the embasis for orifice direction control and centimetric graduations

## SOFTFIL® NEEDLE

**AT YOUR FINGERTIPS,  
FOR OPTIMUM RESULTS!**

Inspired by the design of SoftFil® Precision micro-cannulas, the SoftFil® Needle range enables practitioners to meet potential challenges such as difficult treatment areas, the need for varying levels of flexibility and handling different filler viscosities.

With such an extensive choice of tools, literally at their fingertips, practitioners can achieve optimal results.

## SoftFil® Needle

### FEATURES

- Specific inner calibre
- Graduation in centimetres
- Specific surface treatment
- Red dot on hub
- Female Luer-Lok screw fitting system
- 6 lengths and calibres

### BENEFITS

- Reduce injection pressure and increase precision
- Symmetrical control of injection depth
- Perfect sliding
- Indication of bevel orientation
- Extra security

# SOFTFIL® SKINCARE PRODUCTS

## SHEER BEAUTY

In addition to their injection products, SoftFil® also offer a range of cosmetics (including a skin massager) specifically designed for post-injection care with daily skincare treatments that can really benefit your patients.

# SKIN HARMONY

.....  
Masks infused with active ingredients are proving to be a very popular and highly effective way of nourishing and revitalizing the skin, especially in the context of post-treatment care.  
.....

SoftFil® use new generation textures (hydrogel, bio cellulose) and carefully select only the very best and most effective active ingredients for their skincare range, all prepared under strict dermatologist control.

## SOFTFIL® POST-ACT MASK

The ultimate post-treatment mask with hyaluronic acid to improve hydration.

SoftFil® Post-Act Mask is easy to apply, the skin is visibly brighter and ultra-hydrated. Suitable for all skin types: **dry, normal, combination, oily, mature and sensitive**.

### FEATURES & BENEFITS

- Non-woven sheet mask for the face
- Ideal for intense post-treatment hydration
- Soothes and reduces any potential puffiness
- Favors elasticity
- Boosts the plumping effect, smoothes out fine lines
- Contains hyaluronic acid to amplify hydration properties and glycerin
- Paraben-free

Soothing / Moisturizing

**AH/HA**

**100%** of persons who tried the mask for the first time appreciated its **soothing effect**

**95%** of persons surveyed felt that their **skin** was **smoother** and more **supple**

*Test performed on 21 men and women (39-years-old on average) after a single application.*

## SOFTFIL® SUBLIM'MASK

The ultimate moisturizing and radiance-boosting, ultra-fine mask: this hi-tech mask evens out skin tone and nourishes the skin instantly. Combines innovation, comfort and performance. SoftFil® Sublim'Mask really is a unique and soothing care product especially for dry and sensitive skin.

### FEATURES & BENEFITS

- Ultra fine bio-cellulose fiber obtained by natural fermentation of coconut milk
- Anti-oxidant properties
- Enhances the skin's elasticity and firmness
- Brighter, more even skin tone
- Reduces age spots
- Fragrance and paraben-free

Radiant / Anti-oxidant

Bio-cellulose

**95%** of persons surveyed said that their **skin** stayed **moisturized** all day long

**95%** of persons surveyed said that their skin looked smoother, more supple and **visibly more even**

*Test performed on 21 men and women (42-years-old on average) after a single application.*

## SOFTFIL® SUBLIM'EYE CONTOUR PATCH

The ultimate treatment for decongested, brighter, rejuvenated eyes: using a new generation, non-oily hydrogel for optimal diffusion of active ingredients. The SoftFil® Sublim'Eye Contour Patch is easy to apply and eyes feel instantly refreshed.

Suitable for all skin types.

### FEATURES & BENEFITS

- Dual moisturizing effect to reduce puffiness and dark circles
- Smooths fine lines and beautifies the eyes
- Brightens the delicate eye contour
- Easy application
- Contains red algae, cornflower and witch hazel extracts, glycerin and D-panthenol
- Fragrance and paraben-free

**100%** of persons surveyed said that their **skin** looked **younger**  
**95%** of persons surveyed said they would recommend this product

*Test performed on 22 men and women (37-years-old on average) after a single application.*
